

METALARC®

General Purpose Metal Halide Lamps

Key Features & Benefits

- Broad range available – up to 1500W
- Well-balanced white light
- Multiple choices allow design flexibility
- Low initial costs
- Universal operating position on most types
- Lead-free base and lead-free glass
- Available in clear and coated
- SUPER METALARC lamps offer increased light output up to 105 LPW
- Compact METALARC lamps offer increased system efficiency for smaller luminaires

STANDARD METALARC lamps are an economical choice for a high efficacy, long life, white light source.

SYLVANIA STANDARD METALARC lamps are offered in a range of wattages from 175 to 1500 watts. This family of lamps allows for design flexibility with multiple light source solutions to choose from. Lamps with universal operating position allow for a wider range of applications. In addition, METALARC lamps have significantly higher efficacy than mercury vapor or incandescent and considerably better CRI than mercury vapor and high pressure sodium. METALARC PRO-TECH® lamps for use in open fixtures are available.

COMPACT METALARC 175, 250 & 400 watt lamps provide increased system efficiency, due to a smaller outer jacket that enables operation in a reduced fixture profile with higher system efficiency. The reduced bulb diameter allows the fixture designer to locate the lamp arc tube closer to the reflector, thereby increasing fixture efficiency.

SUPER METALARC lamps provide a higher light output than comparable standard metal halide lamps.

Product Offering

Wattage	Bulb Shape	Finish
175	ED17/ED28	Clear, Coated
250	ED18/ED28/BT28	Clear, Coated
400	ED18/ED28/ED37	Clear, Coated
1000	BT37/BT56	Clear, Coated
1500	BT56	Clear

Application Information

Applications

- Area lighting
- Canopy lighting
- Industrial and commercial
- Parking lots
- Retail facilities
- Shopping malls
- Sports lighting
- Street lighting
- Warehouses

Application Notes

1. Lamps are rated for use in enclosed fixtures.
2. Most are designed for universal burning positions.

Fixtures

Contact your local fixture agent for available fixtures.

Ballast Information

Lamps are approved for use on systems meeting the respective ANSI standard (see Ordering and Specification Information section for more details).

*Please be advised that beginning Fall 2019, all lamps that were previously listed as S-rated for open/enclosed fixtures will transition to E-rated for enclosed fixtures only – as indicated on lamp etch and packaging.

Notes:

1. For lamp wattages of 360W and greater, it is recommended that lampholders with nickel-plated copper alloy center contacts (with spring) should be used rather than electrical contacts made of stainless steel.

2. Published rated life based on 5 hours per start. Life rating will increase to 6,000 hours if operated for at least 11 hours per start in the base up position.

3. Position-Oriented Mogul base.

Sample Specification

Lamp(s) shall be (a) METALARC® metal halide lamp(s) rated for universal operating positions and constructed with a lead-free base and lead-free glass..

Safety Information

WARNING: This lamp can cause serious skin burns and eye inflammation from shortwave ultraviolet radiation if the outer envelope of the lamp is broken or punctured. Do not use where people will remain for more than a few minutes unless adequate shielding or other safety precautions are used. Lamps that will automatically extinguish when the outer envelope is broken or punctured are commercially available. This product conforms to the following federal regulations: U.S.A.: 21 CFR 1040.30 and CANADA: SOR/80-381.
